SUMMARY

My path started in management and then shifted to computer science, with my love for programming guiding me all along. Much of my learning has been self-taught, deepening my passion and understanding of technology. This mix of business and tech skills helps me look at problems in a complete way. I'm always curious and keen to learn more. Excited to use my abilities and new ideas in the tech field, I'm ready to make a difference with my self-taught knowledge and unique perspective.
